

Who we are

Daniel K. Meier

Since 1979, Daniel Meier has worked in the financial industry. He has learned the banking business from scratch at Schweizerische Kreditanstalt (now Credit Suisse). In this Institute he worked until the early 90s. Subsequently he worked for a Swiss asset management company in the rank of Director member. In 1999, Daniel Meier founded the SMF Swiss Invest GmbH.

There it was always a concern to be able to individually advise his clients to take without regard to the interests of the employer (Bank). His goal was allowed to have founded his company in 1999.

Change to its activity in the partially hectic world of exchanges he finds in his hobbies, golf, football, motorcycling, traveling and reading.
